- Arri 15mm base plate with dovetail
- (1) 12 volt power cable

Asking
\$ 30,000

The Arriflex BL4s is the top of the BL class with a brighter eyepiece, illuminated groundglass, digital footage meters, and a quieter adjustable pitch movement. The 4s magazines also come with external pitch adjustment. The camera's available shutter angles are 144, 172.8, and 180 with 6 - 40 frames per second available. Dual Pin registration and two single prong pull-down claws guide the film.

Overall, this package is in excellent condition with everything functioning properly. This goes for the cosmetic condition, as well, as there are only minor scratches to the paint. The mirror shutter is immaculate and the camera is still extremely quiet. Over the years, the package has been used on our own productions as well as a limited number of rentals.

The gear has avoided the abuse of feature films or long term rentals and has always been well maintained. Whether you're shooting shorts, features or anything requiring 35mm sync sound production, this is the camera package for you.

It's available for a great price and if you are unhappy with your purchase, just return it within 7 days and we will refund your money minus the cost of shipping. You may call Charlie at 305 757-5859 or email us at callen@cinemaeast.com or sallen@easternvideo.com to make arrangements for previewing the camera or to ask any questions.
